

supporting climate-smart development

WE ARE HIRING: Software Developer Intern (Full stack)

We are a Canada-based company with an office in Yaoundé-Cameroon. We work on one of the major challenges of our generation - climate change. Our mission is to advance climate-resilient and low-carbon development solutions and lifestyles that safeguard the environment.

We are looking for a full stack software developer intern who is a self-starter, can work independently, and is highly motivated to contribute in helping us build the next generation of carbon credits trading platform. Our ideal candidate has experience building core services and web-based platforms from the ground up, and cares just as much for the product itself as the technology that powers it. You will have the freedom to select both the frontend and backend technology stacks necessary to build a system that is scalable, highly secured and robust.

Tasks and Responsibilities

- Research and select the best tech stacks for the platform
- Design, implement, and maintain the platform
- Work collaboratively with other team members and stakeholders to deliver on business commitments.
- Assist in the recruitment of other software developers for the team.

Your Profile

- Should have a Bachelors, Masters or PhD in Computer Science, Software Engineering or the equivalent.
- Full stack web development experience
- Comfortable with every phase of the software development process
- Experience building large scale, customer facing applications
- Experience deploying applications to AWS cloud.

Deadline for Application: until position is filled

Starting date: As soon as possible

Location: Yaoundé, Cameroon

To apply for this internship position, send: your CV, a cover letter, and a list of two referees to kenongene@fokabs.com and media@fokabs.com.

Subject heading should be: "Software Developer Intern".
