Protected Area Goods & Services

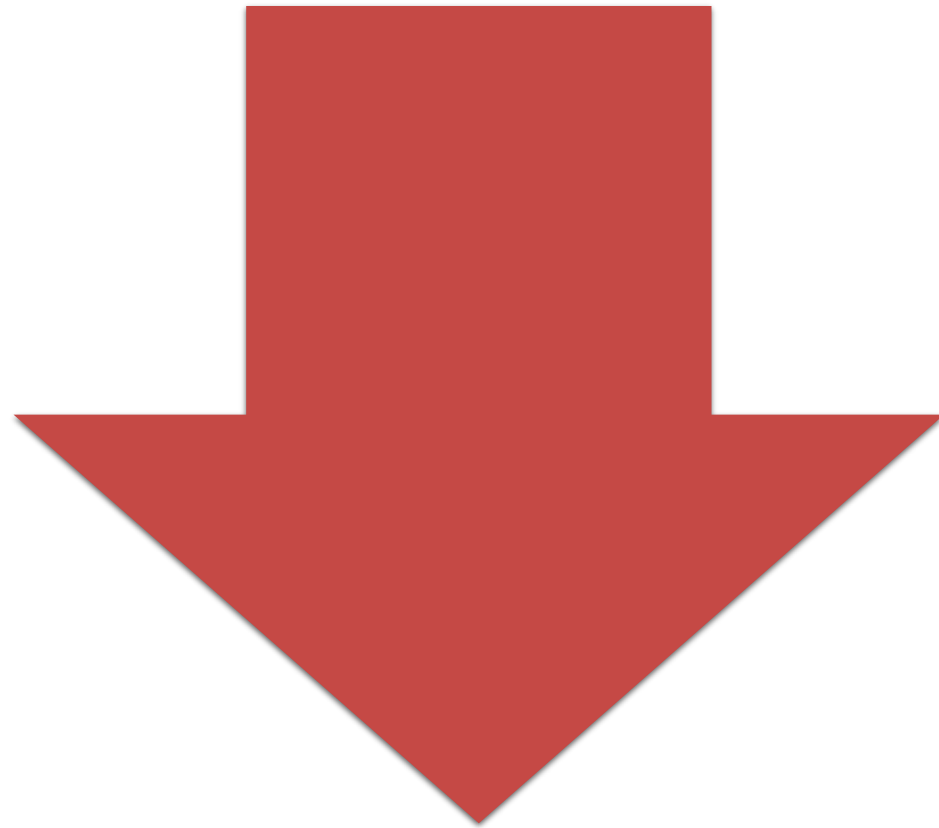

- Biodiversity Protection
- Source of Revenue
- Employment
- Watershed Services
- Carbon Sequestration
- Soil Retention
- Ecosystem Resiliency
- Pollination
- Climate mitigation
- Water filtration
- Genetic material
- Flood control
- Wild food sources
- Medicinal plants/animals

An aerial photograph of a savanna landscape. A river winds through the center of the frame, surrounded by dense green and brown vegetation. In the background, a range of low mountains stretches across the horizon under a clear blue sky with scattered white clouds. The text is overlaid in white, bold font across the middle of the image.

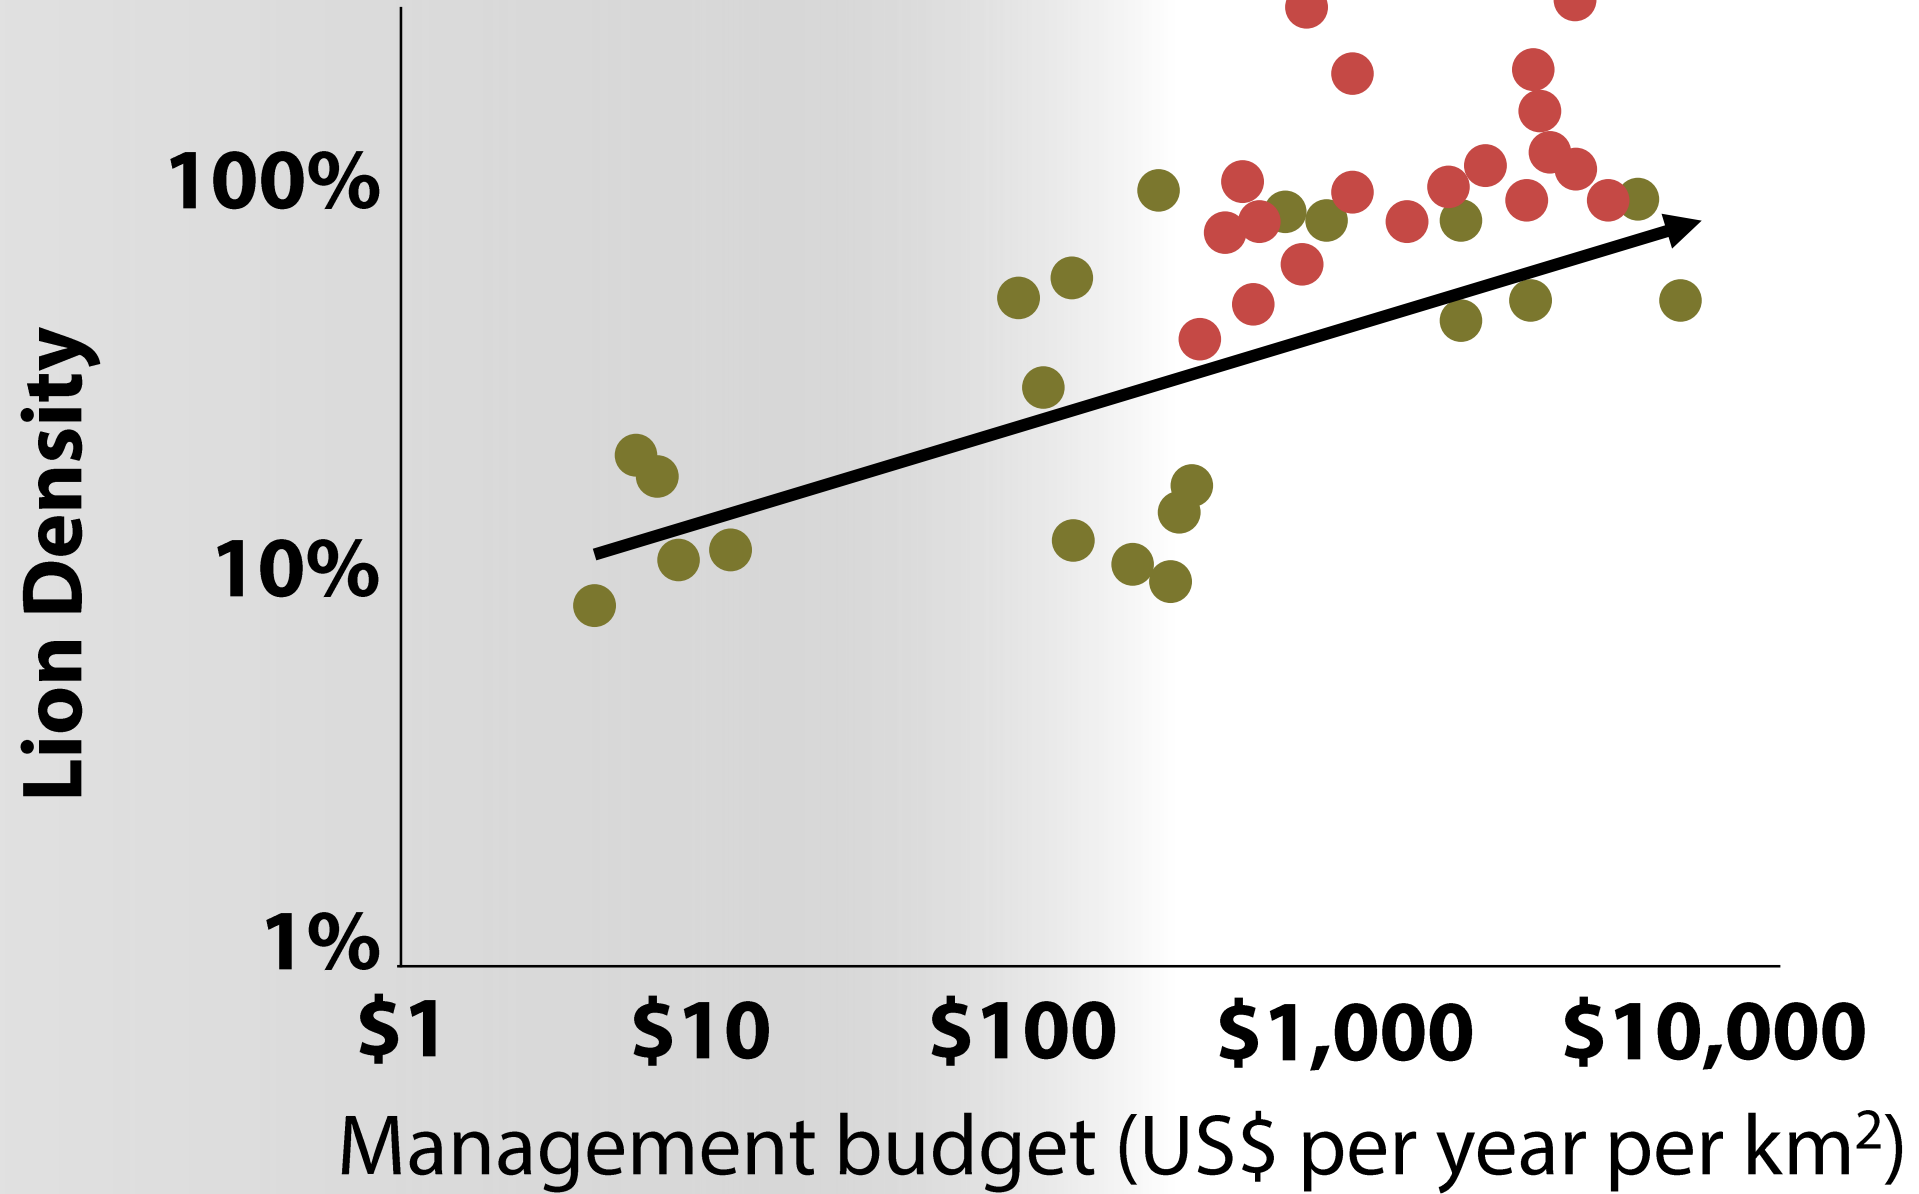

**To secure these crucial ecosystem services,
Protected Areas need to be properly protected and
managed, which requires adequate finance.**

TOTAL

Co-Management

Co-management in Africa

- Co-management agreements are increasing across Africa to increase financial and capacity support for protected areas
- Donors in some cases are requiring co-management agreement as a requirement for financing
- Most countries we work in now have legal framework that enable PA Authority to enter into co-management agreements, also referred to as public-private-partnerships (PPPs)

Co-Management Models

No Legal Agreement or Commitments

Increased risk & responsibility by the Partner

Increased clarity on structure and roles & responsibility

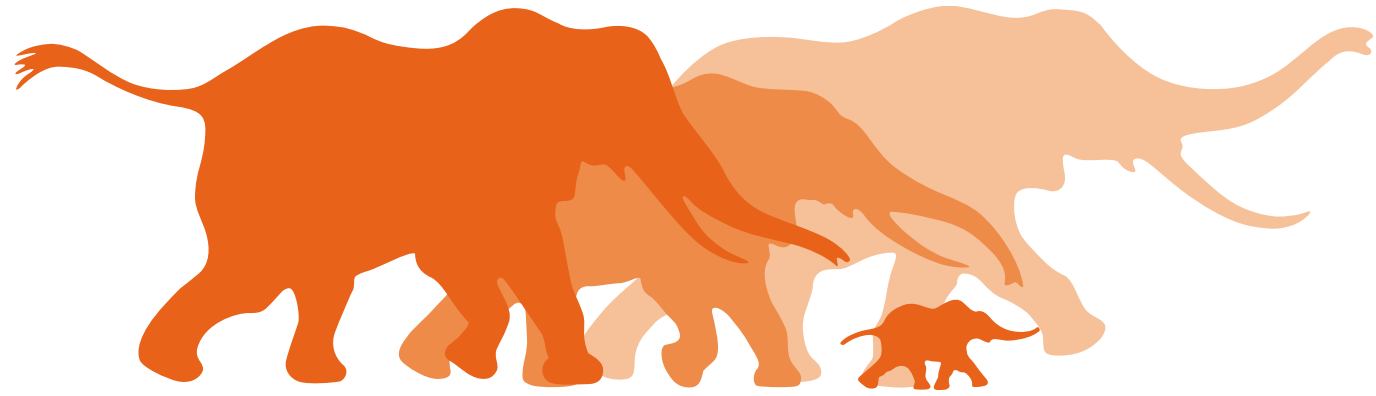

Boost tourism by investing in Protected Areas to become viable business entities

A wide-angle landscape photograph of a savanna. The foreground is a vast, open plain with dry, yellowish-brown grass. Scattered across the plain are numerous small, green acacia trees. In the middle ground, the terrain is covered in a dense layer of similar trees and shrubs. In the background, a range of dark, forested mountains stretches across the horizon under a heavy, overcast sky with grey clouds.

Boost tourism by investing in Protected Areas to become viable
business entities

Promote Public Private Partnerships
