

SMART

Improving management effectiveness
of protected areas in Central Africa
using SMART

Emma J Stokes
WCS – Africa Program

La protection de la biodiversité

Manque de transparence, coordination et des lignes directrices sur le terrain

La conservation au niveau du site

Ecogardes

Une application de la loi plus efficace

Gestionnaires

Prise des decisions stratégiques

Communautés locales

Soutenir une gestion communautaire

La rôle de SMART

Information sur les zones importantes à patrouiller

Information sur le performance des patrouilles

Comment ça fonctionne sur le site?

Collecte de données

Debriefing

Planification des patrouilles

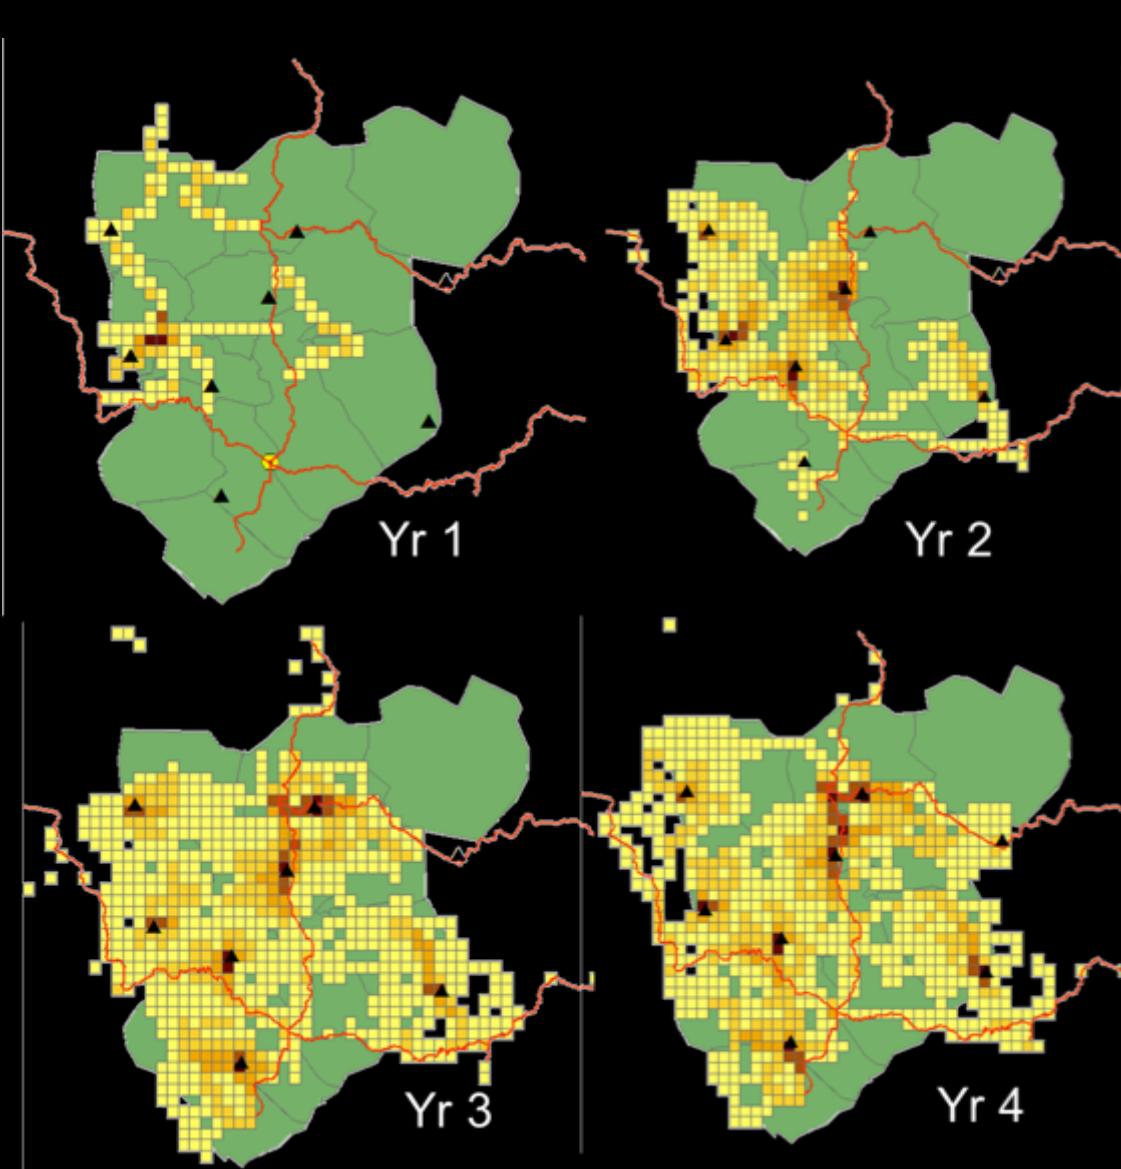

Faire analyses

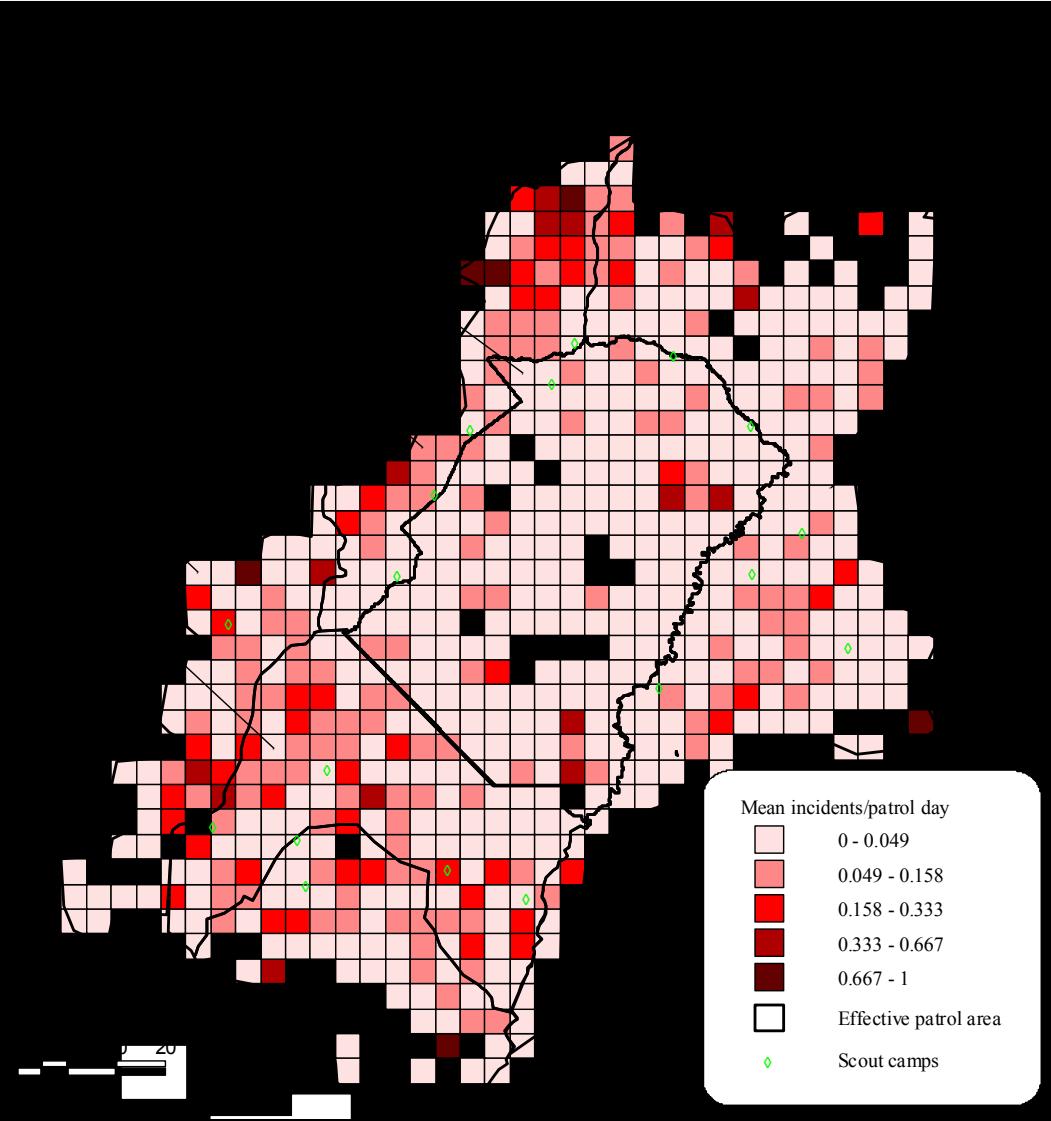

A screenshot of a software interface titled "PreyLiger PreyLiger Forest Conservation Project". It shows a "Data entry" section with a table of data and a "Danger report" section with a table of data. The danger report table includes columns for "ID", "Species", "Prey Type", "Age", "Sex", and "Status".

ID	Species	Prey Type	Age	Sex	Status
1	Banteng	Adult	1	M	Dead

WHY SMART?

Traditional tools, technologies and resources are not stemming the illegal killing and trading of endangered species. As a result threatened and highly valued biodiversity such as tigers, rhinos, elephants, great apes and their habitats are being lost.
