The "Zero Poaching" approach and it's applicability in Central Africa

THE CONTEXT

Multiple actors in conservation...

THE CONTEXT

- Areas/aspects easy to cover
- No-go zones: too risky (branding, reputational), lack of capacity etc.
- Competition amongst actors
- Duplication of efforts
- Lack of/limited impact: increase in poaching

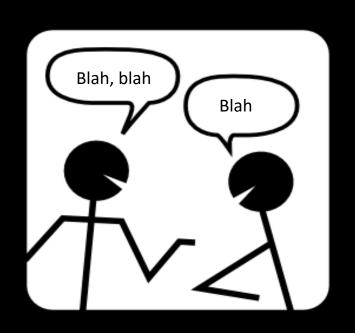

DEFINITION

A site achieves Zero Poaching when:

- there are no detectable traces of poaching activity in that site
- over a defined period
- there is no discernible impact on a species in that site to recover and sustain a population

MORE THAN A TITLE

People may say Zero
Poaching is not achievable
and there will always be
some poaching no matter
how good the enforcement

But Zero Poaching is not just about trying to get to absolute zero!

MORE THAN A TITLE

Zero Poaching is:

- An approach to minimize poaching
- An ambitious target instead of a goal to achieve

➤ a rallying call for us to act together to minimize current species loss due to poaching

REALISTIC GOALS

Countries can try to achieve Zero Poaching:

Over any defined area

For any species of concern

If Nepal can achieve it so can other countries...

MISSION

Zero Poaching will be driven forward through a strong collaboration of governments, IGOs, NGOs and civil society for the benefit of conserving living natural resources and securing the future of people who depend on them through the implementation of a framework composed of six pillars.

BRIDGING THE GAP TO ACHIEVE ZERO POACHING

ASSESSMENT

Conduct regular effectiveness assessments

TECHNOLOGY

Use the best available tools & technologies

CAPACITY

Increase field staff's ability to protect wildlife

COMMUNITY

Engage with local communities

PROSECUTION

Improve approaches for prosecution

COOPERATION

Share information regionally & nationally

SUPPORTERS

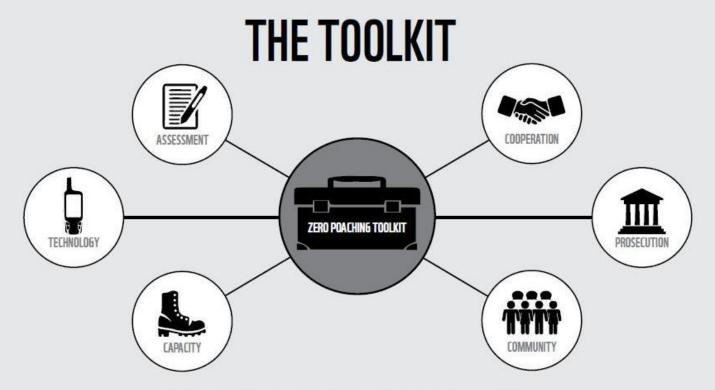

When used together, these tools can stop poaching.

This Toolkit helps national and state agencies, protected area managers, rangers and other frontline protection staff close gaps in anti-poaching efforts. The tools are freely available and well supported by a host of organizations. Using this Toolkit sends a strong international message that a country is taking steps to ensure its natural capital and iconic species continue well into the 21st century and beyond.

Close gaps in protection activities

The tools below are recognized as the most practical ways to identify and close gaps in protection activities happening at the ground level. Each tool provides useful resources for the people responsible for carrying out anti-poaching work, however the largest benefits are when tools are used together.

ASSESSMENT

Conduct regular effectiveness assessments

- CONSERVATION ASSURED
- IUCN MANAGEMENT EFFECTIVENESS EVALUATION (MEE)
- UNODC/ICCWC WILDLIFE AND FOREST CRIME ANALYTIC TOOLKIT
- NATIONAL AND SUB-NATIONAL WILDLIFE PROTECTION AUDITS

Implement useful and cost effective technology

Adopting technologies can be a true game changer for stopping poaching. However with an increasing number of technologies available for anti-poaching work, finding the most useful and cost effective tools can be a challenge. The tools below cover a wide range from mobile tech and apps to dogs to DNA sequencing.

- SMART: SPATIAL MONITORING AND REPORTING TOOL
- POACHER SURVEILLANCE TOOLS
- TRACKING & SNIFFER DOGS
- DEEP SEARCH METAL DETECTOR (DSMD)
- UNMANNED AERIAL VEHICLES (UAV)
- INTERNET SURVEILLANCE
- MOBILE PHONE TRACKING TOOLS

Train and motivate staff to provide the best protection

Anti-poaching staff who are adequately trained, paid and looked after with decent housing, equipment and on-going mentoring will be motivated to succeed in their careers protecting wildlife. Using standardized training manuals helps improve staff skill levels; where possible countries should develop wildlife colleges and improve staff welfare. Countries that invest in their staff show a tangible investment in Zero Poaching.

CAPACITY

Increase field staff's ability to protect wildlife

- COMPETENCY STANDARDS FOR RANGERS
- NGO TRAINING SOURCES
- INSTITUTIONAL SOURCES
- IMPROVING WELFARE

Increase community involvement in protection efforts

Securing the support and good will of communities living near those species targeted by poachers is critically important. By building partnerships and networks it is possible to not only understand the dynamics on the ground faster, but also to grow the number of individuals tackling poaching at multiple levels.

COMMUNITY

Engage with local communities

- CRIME PREVENTION STRATEGIES
- HUMAN/WILDLIFE CONFLICT MITIGATION
- INFORMANT NETWORKS
- COMMUNITY HOTLINES

Strengthen prosecution efforts to secure proper convictions

Securing substantial convictions for wildlife crime is a crucial part of achieving zero poaching. A well-functioning judicial-criminal process with stiff penalties discourages poachers as well as encourages the enforcement officers who go to great lengths to make arrests.

PROSECUTION

Improve approaches for prosecution

- IMPROVE LAWS TO PROTECT NATURAL RESOURCES
- WILDLIFE FORENSIC GUIDELINES
- CASE TRACKING

ASSESSMENT

TECHNOLOGY

CAPACITY

COMMUNITY

PROSECUTION

COOPERATION

CONTACT

Improve and increase coordinated actions

Cooperation is key to success. In an increasingly globalized world, the decisions and actions taken in one sphere have great potential for impact in another. Coordinated work across areas, departments and borders to identify key programs and avoid duplication can ensure best efforts are being made to bringpoaching down to zero.

- INTELLIGENCE GATHERING AND ANALYSIS TOOLS
- NATIONAL ENFORCEMENT AGENCY COORDINATION
- REGIONAL WILDLIFE ENFORCEMENT NETWORK
- INTERNATIONAL LAW ENFORCEMENT AGENCIES
- INTERPOLS NATIONAL ENVIRONMENT SECURITY TASKFORCE (NEST)
- I24/7 INTERPOL GLOBAL COMMUNICATIONS

MEASURING PROGRESS

The overarching measure of progress for Zero Poaching is:

to ensure countries are implementing the 6 pillars of the toolkit

to measurably move towards Zero Poaching in all key sites for threatened species by 2020

STRATEGY

- Mainstream Zero Poaching into international law enforcement and conservation strategies such as global species and wildlife crime led initiatives
- Support the development and delivery of National Zero Poaching Action Plans based on rapid assessments of implementation gaps
- Support the development and implementation of tools under the Zero Poaching Toolkit.

Step 1

Countries commit to attempt to achieve Zero Poaching

Decide on areas to be covered

What species of concern are in those areas?

Step 2

Zero Poaching collaborative groups formed

Assist governments to bring together NGOs and regional bodies

Step 3

National plans drafted

National plans drafted by appropriate government ministries/departments in collaboration with and supported by NGOs, IGOs. These will be aligned with existing conservation and wildlife law enforcement plans as far as possible

Step 4

National plans implemented

Funding alignment

Step 5

Zero Poaching progress monitoring

A robust monitoring and evaluation system is being developed to ensure proper and timely roll out of Zero Poaching

DO THIS TOO!

Seek champions for the cause

They can be literally anyone that has standing in your country's communities.

The higher the status, the better to give the highest profile for what is happening with Zero Poaching in your country.

ZERO POACHING
